

## **HAWKS OVER THE HEADLANDS**

SATURDAY, OCTOBER 3

10:00 AM TO 1:30 PM

*With Allen Fish*

The Pacific Coast's greatest raptor thoroughfare is at the Marin Headlands, part of our neighborhood Golden Gate National Recreation Area. Come watch hawks, vultures, kites, harriers, osprey, eagles, merlins, kestrels and other falcons with Allen Fish, the Director of Golden Gate Raptor Observatory since 1985. Allen will bring a variety of pictures, props and raptor books to help us identify the different species and to pass the time between bird sightings! Come feast your eyes on this spectacular natural event!

Meet at the base of Hawk Hill at 9:50 AM to check in with MAS then we shall walk up the Hill to meet our leader and begin raptor spotting! There will be a GGRO Banding Demonstration at 1:00 PM wherein a live hawk is brought over from a banding blind for a brief up-close showing prior to its release. Binoculars are a must and layered clothing and lunch are recommended!

Go south on Hwy 101 and take the last Sausalito exit before the Golden Gate Bridge. Head up Conzelman Rd for approx 1.8 miles, park at the side and walk the few hundred yards up the trail to the Hill.

For more information call the GGRO at (415) 331-0730 or go to [www.ggro.org](http://www.ggro.org).
